Collaboration Strategy

Workflow coordination

Tools

GitHub

GitHub is a cloud-based platform where you can store, share, and work together with others to write code.

SQLite DB Browser

is a high quality, visual, open source tool designed to create, search, and edit SQLite or SQLCipher database files.

HTTPie

HTTPie is a modern, user-friendly application HTTP client designed for testing and interacting with APIs.

Git

Git is a free and open source distributed version control system designed to manage projects of all sizes with speed and efficiency.

Workflow coordination

We used a simple and effective method:

- the workload was assigned equally to each member
- each of us worked in a specific branch
- each branch was eventually merged into the main one
